

HIGHLIGHTS OF GEOGRAPHY AND CLIMATE IN WISCONSIN

Land and Water Area — Wisconsin encompasses 34.8 million acres, not including those parts of the Mississippi River and Great Lakes located within the boundaries of the state. Its inland lakes, covering more than 982,000 acres, make up almost 3% of the state's total surface area. Based on land area, the largest county in the state is Marathon with 988,774 acres; the smallest is Ozaukee with 148,448 acres. The geographic center of the state is located in Wood County about 9 miles southeast of Marshfield.

Lakes — The largest lake in Wisconsin is Lake Winnebago (137,708 acres), which covers parts of three counties; the deepest natural lake is Green Lake in Green Lake County with a maximum depth of 236 feet. Most of Wisconsin's largest lakes are concentrated in the northern two-thirds of the state, and they include artificial bodies of water created by dams. Wisconsin has 15,074 lakes (6,040 named). Green County has only five lakes while Vilas County has 1,318.

High Points — The state's highest recorded elevation is Timms Hill in Price County, at 1,952 feet. There are also other recorded elevations of at least 1,900 feet in Forest, Langlade, Lincoln, and Marathon Counties.

Temperature — In 2009, the annual statewide average temperature was 42.3° Fahrenheit. Across the state, normal regional temperatures vary from 39.5° in the north central area to 45.4° in the southeast. Normal temperatures are the averages for the period 1971-2000, based on computations by the State Climatology Office.

Precipitation — In 2009, the total statewide average rainfall was 30.19 inches. Regional precipitation averages varied from a high of 39.02 inches in the south central area to a low of 24.35 inches in the northwest area. Normal precipitation correspond to the averages for the period 1971-2000, according to the State Climatology Office.

The following tables present selected data. Consult footnoted sources for more detailed information about geography and climate.

¹County listed first contains the water's source of origin. Other counties covered by the water area are shown in parentheses.

²Lake Pepin is part of Mississippi River backwaters. Definite area cannot be determined because of fluctuations, but past Department of Natural Resources estimates have exceeded 24,000 acres.

³Green Lake, at a maximum depth of 236 feet, is Wisconsin's deepest natural lake.

*This list is based on data compiled by the State Cartographer's Office and includes the highest named point in each county having an elevation of at least 1,000 feet. Timms Hill in Price County is the highest point in Wisconsin. The listing should not be construed as a ranking of all of the highest points in the state because 1) it includes only named features; 2) it includes only one high point per county; and 3) there may be others of comparable height that are unrecorded. Many elevations are approximations.
